Why NOX LVS+ GREEN is different

1 Sustainable Innovative Technology

Circular IVP

- Closing the loop [Recycling]**
Producing 100% recyclable products only
- Carbon Zero [Raw Material]**
World's first to apply Bio-Circular Balanced PVC to the entire product line
- Waste Zero [Manufacturing & Logistics]**
Reduced carbon footprint by closely locating the manufacturing plant and cutting the logistic distance
- Resource minimized [Installation & In-use]**
Launched the World's first eco-friendly non-adhesive LVT click flooring 'ECOCLICK' and Looselay LVT 'ECOLAY' in 2003

From Raw Material to Recycling NOX LVS+ GREEN, the new sustainability standard of flooring

NOX is an industry-leading company redefining the sustainability standard of flooring by applying Bio-Circular Balanced PVC to the entire product line, including LVS+, and producing 100% recyclable products only. Bio-Circular Balanced PVC is a sustainable raw material that reduces carbon emissions by 114% compared to conventional raw materials. It is also certified by ISCC PLUS, the world's most prestigious sustainability certification that demonstrates compliance with the legal sustainability requirements specified in the Renewable Energy Directive (RED).

More Hygienic and Safer, EPT™ Shield Coating

The eco-labeled premium matte coating is safer, having **zero heavy metal content**. It is also highly hygienic, **with excellent resistance to mold, discoloration, and contamination, making cleaning and maintenance easier**. Additionally, matte-finished texture gives a natural and realistic feeling of touch.

- Anti-bacterial Non-Slip PU coating treatment
- Clear design protection layer

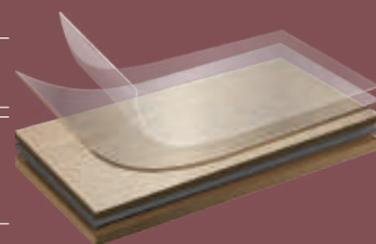

More Sturdy, NOX EMT™ Core Multi-Layer Structure

The multi-layer structure flooring with globally proven **strong durability**. Not only is it resistant to dents, but it is also stable with a **consistent thickness**.

- HD design print layer
- Fiberglass stabilization layer
- High Elasticity Cushion layer

NOX LVS+ GREEN Structure

Much Quiet, EMT™ Core SoundProtec

A **high-density cushion layer** with NOX technology **absorbs the general living noise and shock of walking**.

Why NOX LVS+ GREEN is different

2 More Realistic, More Natural

01 — More Realistic, Embossed-In-Register for a realistic feeling of touch

Embossed-In-Register

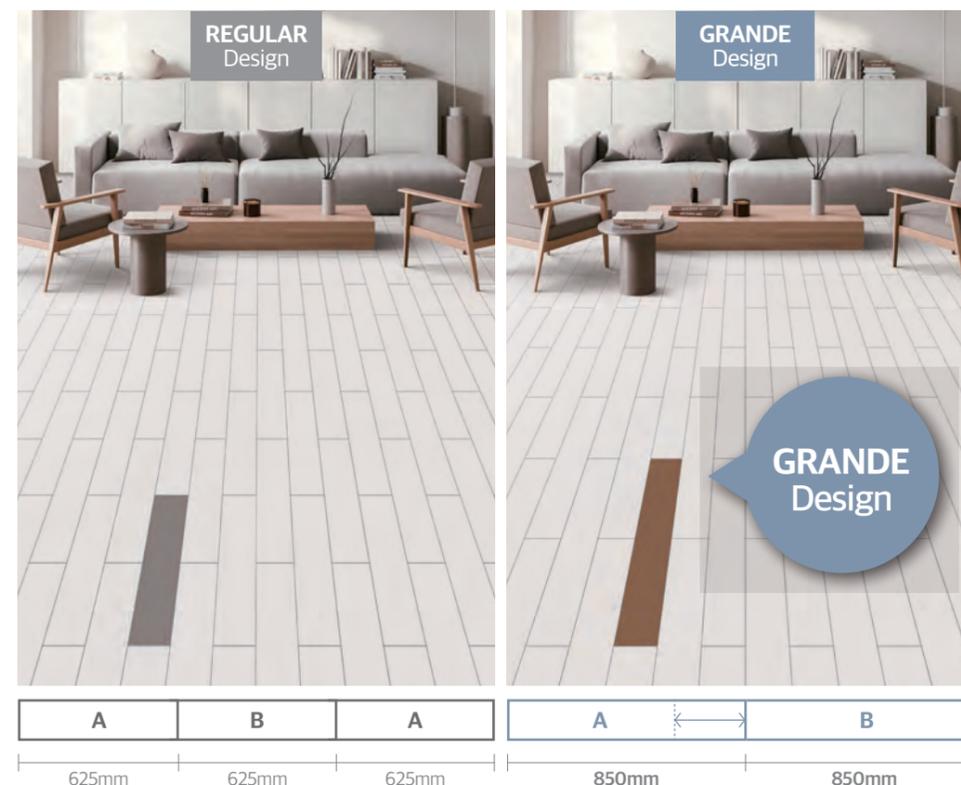

NOX's advanced Embossed-In-Register technology and matte coating present a more natural-like texture and visuals, even wood grain and tile grout lines—these natural and realistic feelings of touch and visuals grant a luxurious mood to the space.

02 — More Classic, curated designs for all space types

NOX's in-house design team presents a carefully selected curation of classic designs that fit into any space. A detailed portrayal of the stone and wood's unique features will upgrade the existing space with freshness.

03 — More Natural, 'GRANDE Design'

'GRANDE Design' planks are designed in a large size, making patterns repeat less. Installing these planks will make the flooring's visual more seamless and natural, making the space more expansive while highlighting the wood and stone's natural texture.

Why NOX LVS+ **GREEN** is different

3

Much Safer, More Reliable

01 — Eco-friendly Flooring for family and nature

Phthalate-free! Heavy Metal-free!

NOX LVS+ GREEN uses Bio-Circular Balanced PVC, reducing 114% of carbon emissions.

02 — Great Foot Comfort (2.2T)

A high-density cushion layer with NOX EMT™ Core technology absorbs the shock and provides soft foot feelings.

Shock Absorption Test Results

NOX LVS+ GREEN absorbs the shock 1.5 times more than the wood floorings.

03 — Non-Slip Surface Coating

Slip Resistance Test Results

A test to measure the slipperiness of barefoot, the higher the number of C.S.R.B, the better the slip resistance.

Laminate / Enhanced Engineered Wood **0.39**

NOX LVS+ GREEN

0.6

1.5X HIGHER
than typical wood flooring

※ Tested under the standards of KS M 3510 and KS M 3802 ※ Test results may differ by condition.

※ Tested on a wet surface, barefoot. (tap water sprayed in 400g/m² proportion) ※ Test results may differ by emboss type

04 — Healthy choice for all family members, NOX LVS+ GREEN

Prevent Pets' Patellar Dislocation

Protect the Elderly's Knee Joints

Decrease Children's Risk of Injuries

Why NOX LVS+ **GREEN** is different

4

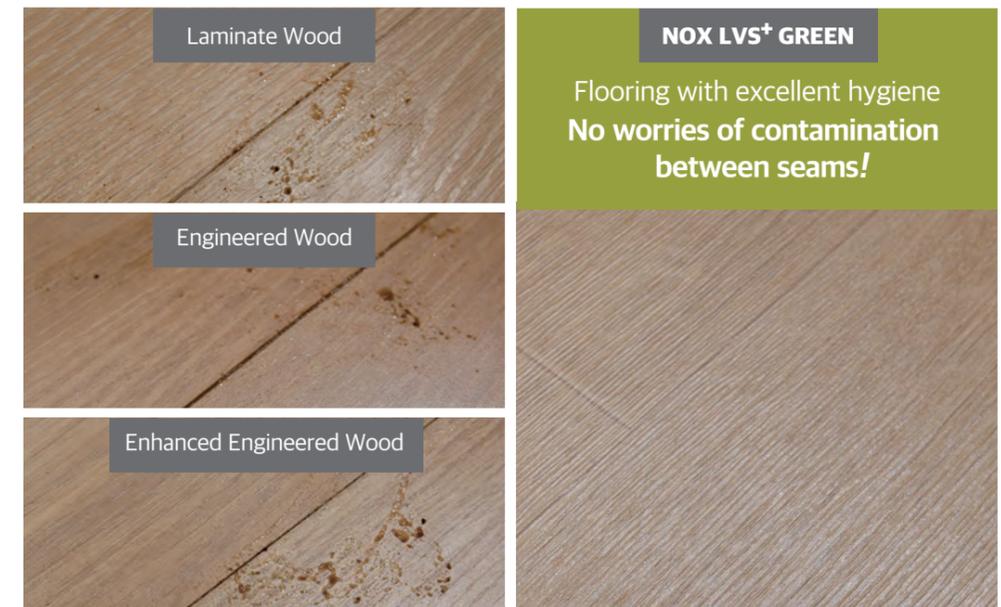

More Durable, More Hygienic

01 — EPT™ Shield Premium Natural Matte Coating

NOX's EPT™ Shield surface coating prevents daily damages such as discoloration, contamination, scratches and dents. NOX is the first in the industry to apply a 'Premium Natural Matte Coating' for a long-lasting luxurious texture.

02 — Easier, Cleaning & Maintenance

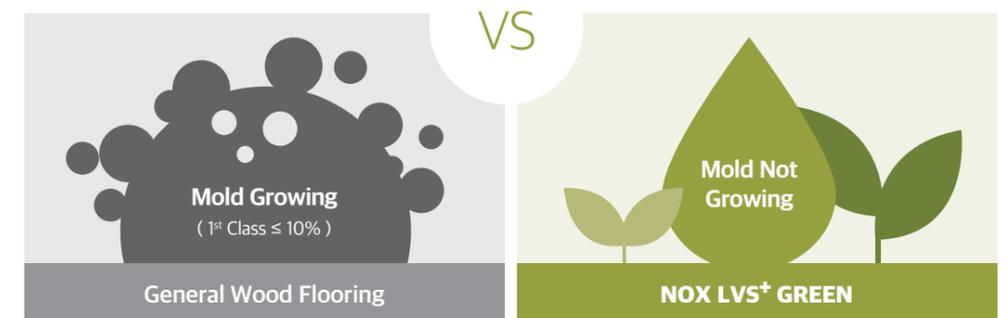

NOX LVS+ GREEN is highly resistant to external contamination between seams.

마루 대비

03 — More hygienic with Anti-Mold Coating

NOX LVS + GREEN has a mold-preventing coating.
